X-840-STS-Dyna

## Specs:

17' 3" Overall Height

60" Basket Diameter Footprint

WLL: 1,200 lbs

145 lbs. Weight

ABS Type Approved

## Personnel Transfer Basket Designed for Ship-to-Ship Personnel Transfers

The X-840-STS "Dyna Basket" is specifically designed for Ship-to-Ship (STS) personnel transfers, where crane booms are shorter and landing space is limited. With a smaller footprint and shorter load line, the basket can safely transfer up to four persons per lift. This device benefits personnel transferring between tankers or Lightering Crews up to vessels without relying on Pilot Ladders. Utilizing UV resistant materials and stainless steel, this basket can deliver safe duty for up to four years in the field. Key to this longer life is regular use of the vinyl storage cover which is a required feature of this product.

X-840-STS-Dyna
