## The "Original" Billy Pugh Tangle Resistant Tagline

The BPC Tangle Resistant Tag Line was the first of its kind when it was introduced over 25 years ago. Over the years it has become the industry standard helping companies achieve safe "Hands Free" cargo lifting.

Due to their unique construction, our taglines are highly resistant to wrapping. This would include personnel, railings, or anything that the tagline comes in proximity to during the lift. Taglines make it much safer for the worker and crane operator to manipulate the load while keeping people at a safe distance from suspended loads.

Billy Pugh Company's taglines are made of polyester yarn rope and dipped in liquid polyurethane which saturates the rope to make it the most durable tagline available in the market. Incorporating horizontal wraps also provides a non-slip gripping surface regardless of whether it is wet or dirty. Our taglines are highly resistant to wrapping (due to their unique construction) or catching on pinch points as they have no knots or raised areas. They are also far less affected by deterioration from UV rays because of their urethane coatings.

## Product Highlights

- Conforms to API Lifting Standards
- Bright red color for high visibility
- UV resistant urethane coating
- High strength giving it a long life in the field
- Flexible end 1m in length with thimble eye
- Carabiner available as an option
- Carabiners/Hooks can be changed out when damaged.
